

DELAVEGA

2025

The 2025 collection continues our dialogue with clients, design bureaus, and partners about what furniture culture should be: human, technological, adaptive. And – honest. In every product, we strive to combine reliability, practicality, and beauty in a balance that works specifically for you.

The updated 2025 model range combines functionality and visual lightness. Beds are equipped with built-in lamps on both sides, shelves with glass inserts, and hidden sockets – solutions born from attention to real user needs. The hallmark of the new models is rounded base forms that emphasize the softness of the silhouette.

Sofas and armchairs of 2025 are a play of shapes and textures. Soft lines, decorative elements, thoughtful details – all so that each piece becomes not just furniture, but part of the home's story.

The 2025 collection is the logical continuation of our path: more technologies, more personalization, more understanding of how to make a space truly comfortable.

## Company

Delavega is a Ukrainian furniture factory specializing in the production of upholstered furniture of its own design. We create sofas, beds, armchairs, and couches that combine aesthetics and technology.

Each of our models is the result of teamwork: we constantly improve product quality, look for modern technological solutions, update production processes, and implement new approaches to furniture design.

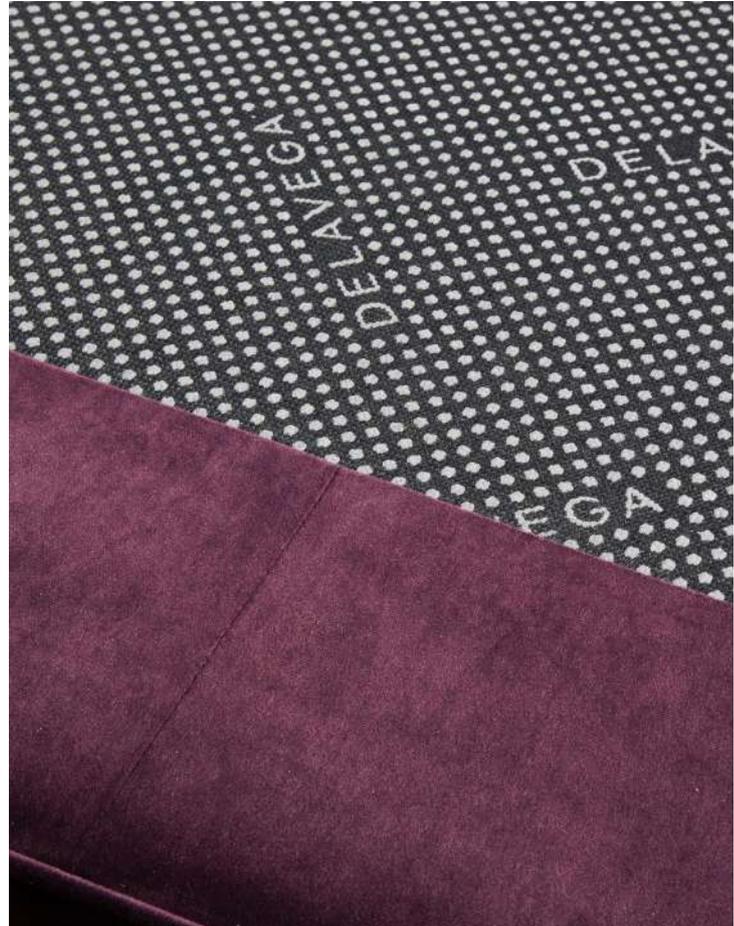

Flexible production, adaptation to non-standard formats, quick communication with partners – all this allows us to remain as effective as possible in joint work. Delavega means furniture created with an idea, experience, and attention to people.

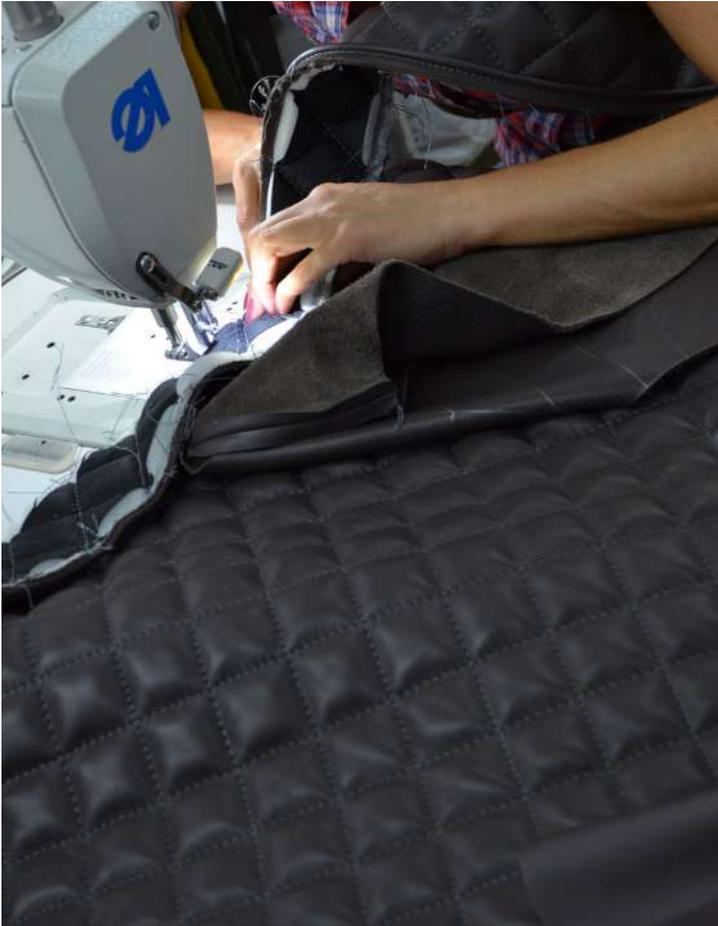

## Equipment and Materials

The Delavega atelier-factory uses equipment from leading European manufacturers – Dürkopp Adler, Martin, Festool, Robuso – and applies natural materials: beech timber, 15-mm moisture-resistant polished plywood, hypoallergenic European fillers, and wear-resistant fabrics (100,000 MD).

All production stages and materials undergo strict quality control.

## Individual Execution

We are convinced that upholstered furniture should not just harmonize with the space. It should correspond to the lifestyle, habits, and needs of the individual. That is why Delavega does not limit itself to standard solutions. We manufacture furniture in custom sizes, help to select optimal design solutions, and adapt each model to the specifics of a particular interior.

The philosophy of personalization is present in every model: from carefully thought-out ergonomics to fabric selection, from color solutions to small hardware accents.

Even decorative elements are not accidental, but part of the story you create together with us.

Delavega furniture is always an answer to a specific request. Not "furniture for everyone," but "furniture for you."

## Warranty

We accompany our clients at every stage: from model selection to long-term use in real life. We believe quality service does not end after purchase, and we provide a 10-year warranty on the frame and filling – the basis of furniture durability.

In addition, we offer free replacement of the filler if, over time, it loses its original shape or softness. This is part of our philosophy of care and responsibility to those who choose Delavega.

## Partnership

Delavega is also about partnership.

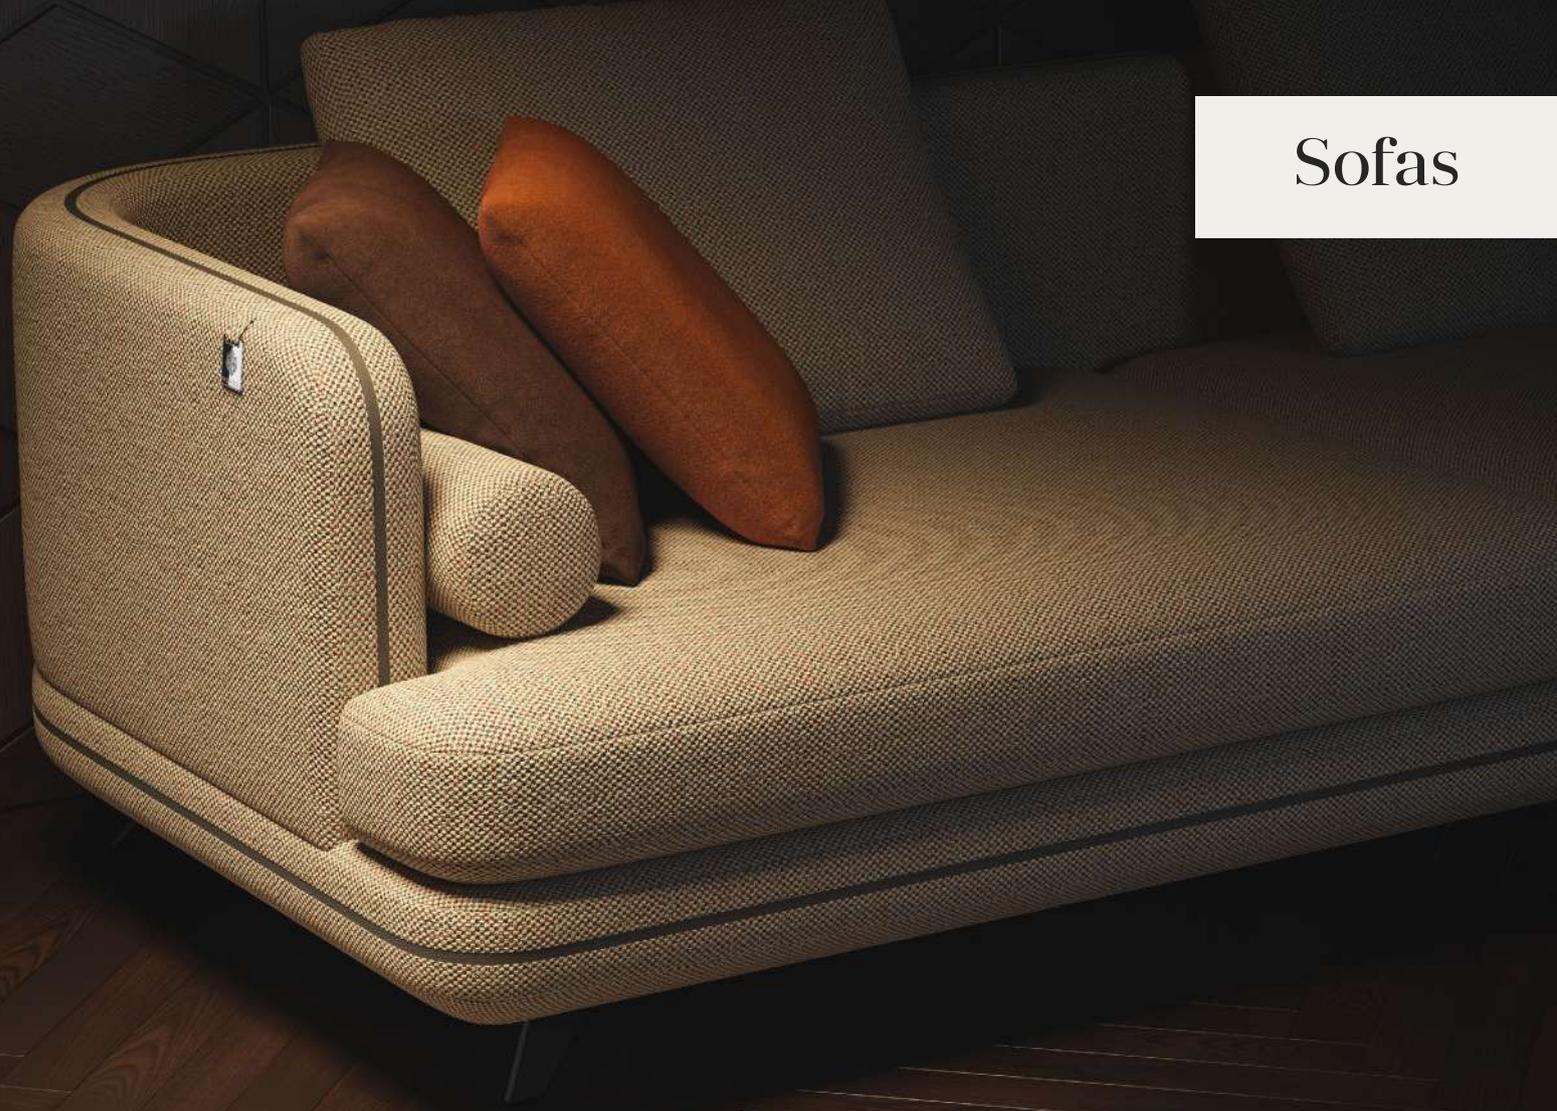

We build stable connections with professionals:

- Architects
- Interior designers
- Studios and architectural bureaus

Our goal is to be not just a supplier, but a reliable participant in the joint process of creating spaces. That is why the entire model range is presented in the form of convenient, precise, and high-quality 3D models that are easy to integrate into any interior project – from conceptual sketches to final renders.

Delavega furniture is used in private interiors, showrooms, public spaces, hotels, and apartments. We work with projects of varying complexity, including large-scale integrated solutions for our clients.
